

Binary Search Tree(BST)

Binary Search Tree(BST): A binary search tree is a binary tree where all node values of the left sub tree are smaller than the node value of the root of the tree and the all the node values of the right sub tree are greater than the node value of the root. Time complexity is BST $O(\log n)$.

Basic operation of BST: there are some basic function of BST such as –

- ❖ Insertion node into BST
- ❖ Deletion a node from BST
- ❖ Searching any node from BST

Practices problems: (i) 55, 77, 50, 83, 45, 20

(ii) 1, 3, 4, 6, 7, 8, 10, 14, 13

(iii) 40, 60, 50, 33, 35, 55, 11, 12

(iv) 10, 30, 50, 78, 90, 95, 100, 105, 110
